MINE ENGINEER-IN-TRAINING

Reporting to the Technical Services Superintendent the EIT will apply their engineering knowledge gained from prior fundamental engineering training and work experience to contribute to the process of engineering from conceptual designs to the final detailed construction plans. The role will alternate between office and site environments to expose the incumbent to the many facets of the mining industry.

ESSENTIAL DUTIES AND RESPONSIBILITIES:

The successful candidate will:

- Leader for the safe and sustainable development of the Bonanza Ledge Mine operations;
- Assist engineers in carrying out technical tasks requiring accuracy in calculations, completeness of data, drawings and adherence to prescribed methods;
- Prepare plans, designs and calculations based on specifications provided;
- Assist in the development of project schedules, scopes of work, execution plans, budgets, and other project management related documents;
- Assist with conducting field work and coordination of mining activities;
- Report to various project stakeholders on project status regarding safety, quality, schedule, and budget;
- Monitoring and evaluating underground performance;
- Planning and implementing extraction systems;
- Other duties as assigned.

REQUIREMENTS OF THE POSITION:

TRAINING / EXPERIENCE / CERTIFICATION / TRAINING

- Hold a University degree in Mining Engineering;
- Eligible or a member of the Professional Engineers and Geoscientists of BC;
- 2 or more years of experience in underground operations;
- Total commitment to health and safety;
- Managing stress and tight deadlines and have a good ability to adapt to change;
- Excellent technical knowledge;

SKILLS AND ABILITIES REQUIRED

- Leadership;
- Team working;
- Confidence;
- Problem solving and analytical;
- Resourceful;
- Independence;
- Strong technical skills;
- Managerial skills.
